**AESTHETIC
TOP PRODUCT**

The SL 500 series includes Herculán's aliphatic, polyurethane self-leveling floor system. A transparent PU topcoat is always added to this system and it is completely color-stable. The system provides a seamless, liquidproof floor finish. The color-

stable characteristics of this system make very light colors possible and ensure that the aesthetic properties are of a very high quality. Areas of application are schools, hotels, shops, houses, care homes, hospitals and libraries.
